

## Terrailon has received two new awards for its smart sleep solution, HOMNI

Terrailon, the French reference in health and wellness products has been awarded two international distinctions for the design and innovation of its flagship sleep product, HOMNI. The Good Design Awards 2017 and IF Design Award 2018 are thus added to the Grand Prix of Innovation at the Foire de Paris and the LSA Innovation Trophy, previously received in 2017.

### Good Design Awards 2017

In December, Terrailon won the Good Design Award in the Electronics category. This award was created in 1950 and is organized by the Chicago Athenaeum - Museum of Architecture and Design, in collaboration with the European Centre for Architecture, Art, Design and Urban Studies. It is one of the world's most prestigious design awards.

The international jury, composed of architects, designers and artistic directors has recognized HOMNI's design and innovative character. In addition to product aesthetics, the Good Design Award also recognizes Terrailon's user experience and ability to develop new consumer habits.

### IF Design Award 2018

Homni also takes its place on the podium for an iF Design Award 2018 in the Product category. The jury of the iF International Forum Design GmbH in Hanover, consisting of 63 experts from all over the world, was also impressed by Homni's concept.

Homni was designed by Terraillon's long-term collaborators Design Partners. This double win rewards the work of Terraillon's teams and the importance given to the design of products with unique design and technology that bring real value in terms of use.

---

### **HOMNI in a nutshell**

At a time when our lives are increasingly fast-paced, stressful and demanding, getting a good night's sleep is key to a balanced life, whether at home or at work. **Sleeping well is as important for the body as it is for the mind**; it is a key element in **promoting the body's ability to recover**. Likewise, the **bedroom environment is a significant factor for quality sleep**.

**Homni is part of a connected ecosystem** capable of analysing your nights in detail: **duration, sleep cycles and body movements**. While the user sleeps, Homni also **analyses the temperature, brightness, sound level and humidity** of the bedroom. All data is then visible on the Wellness Coach - Sleep application to analyse your night and sleep.

**Product available from March 2018**

HOMNI + its "Dot" sensor **£199** (RRP)  
"Reston" sensor **£169** (RRP)
