CES 2017 : Terraillon will launch HOMNI and showcase all new connected wellbeing range

January 5th to 8th in Las Vegas
TECH West – **Stands Expo, Stand #44 147**

Terraillon, the global specialist in metrology and leader in the wellbeing industry, will launch their latest range of smart and cutting-edge health-focused devices, at CES 2017.

HOMNI : the smart sleep solution

From day to night, Homni constantly monitors the wellbeing of its users. Thanks to its four **sensors**, this **intelligent lamp** promotes healthy sleep with adapted light cycles and ambient sounds to help users wake up and fall asleep gently. **Connected** to the new Terraillon dedicated app, Homni analyses the temperature, light, humidity and noise level of the room environment to provide users with tips to achieve a good night's sleep.

R- LINK : the thinnest connected bathroom scale in the world

This attractive, ultra-slim connected impedance meter is designed with the most innovative features essential to weight-loss. Thanks to Terraillon's **BodySense technology**, the scale calculates weight and body composition, while the Bluetooth Smart function automatically synchronises the collected data with the Terraillon Wellness Coach app to help users track results easily.

NUTRISMART : the first connected kitchen scale that analyses food nutritional value and composition

NutriSmart incorporates a **revolutionary technology**: a tiny **SCiO sensor** that analyses the **molecular composition of foods** and provides its **nutritional value**. Thanks to this micro spectrometer, NutriSmart delivers relevant insights such as the type, maturity and origin for any kind of food weighed as well as nutritional value (calorie, fat, proteins and water) in detail. Linked to the Wellness Coach app, NutriSmart uses E-learning technologies to provide more accurate analysis according to user habits and experience.

About Terraillon

Founded in 1908, Terraillon, a leading innovative houseware brand, present in more than 80 countries, designs and manufactures appliances which exceed consumer expectations in health and well-being. Taking advantage of the latest technologies, Terraillon creates cutting-edge smart and connected health-focused devices; ranging from bathroom, medical and kitchen scales to activity trackers and blood pressure monitors. Besides offering precision and comfort, these

devices provide real benefits to users through Terrailon's "Wellness Coach" mobile app for smartphones. Winner of multiple international awards ("Grand Prix de l'Innovation", "Red Dot Design Award" etc.), Terrailon's innovative designs have been exhibited at the Museum of Modern Art in New York. Today, Terrailon is a European leader in the kitchen and bathroom scale markets and exports to over 80 countries in 5 continents. The company sells over 3 million devices worldwide annually. Headquartered in Croissy sur Seine in France, Terrailon has an international team collaborating across different research and development units across the globe. The company also has offices in London, England, Hong Kong and China.
