Next up from Terrailon is the **ACTIVI-T BAND**.

This is something for the active person who wants data and also works with the Wellness app which is also used with Webcoach and the Body composition scales. All these products work well together and work under one app which is useful rather than multiple apps. Check out the unboxing and stay tuned for a review in the coming weeks and if you have any questions fire away.

Features

DISCOVER ACTIVI-T BAND, YOUR NEW DAILY COACH – During the day it records all your activities and helps you to keep on doing better. At night, it monitors your sleep cycles and wakes you gently by vibration. View the results of your hard work instantly on the OLED screen, synchronise your data on the Wellness Coach app and share your performance wherever you are.

YOUR DAILY PARTNER – The Activi-T Band is with you 24 hours a day, 7 days a week. Wear it on your wrist, find out your level of activity and set new goals to be achieved. Its 3D sensor monitors your physical activity: number of steps, distance and number of calories burned. While you're asleep, it analyses the different phases (deep and light sleep) and how long they last, and wakes you up gently by vibration.

COMPLETELY EASY TO USE – The Activi-T Band is equipped with a large white OLED screen that allows you to monitor your activity (steps, distance, calories) directly. For extra practicality, it also tells the time. Two sizes are supplied, Activi-T Band adapts to all wrist sizes. The battery has a life of 7 days and you can recharge it in 90 minutes via the integrated USB port without needing an additional accessory. Ideal when you're on the move or travelling, a simple USB port is all you need.

WELLNESS COACH APP – Activi-T Band connects to the Terrailon Wellness Coach app. Set your goals and get free advice scientifically validated to reach them.
